

Appl. No. 10/666,689  
Amend. dated April 14, 2006  
Response to Office Action mailed on: October 14, 2005

Patent Docket P0706P2C2D2C1  
Express Mail No. EV384508739 US

**Amendments to the Specification:**

Please replace the old title with the following new title

~~HUMAN PF4A RECEPTORS, NUCLEIC ACID ENCODING AND ANTIBODIES BINDING  
THERETO~~

Please replace the paragraph at Page 5, lines 13-19 with the following amended paragraph:

Figures 2A-2C (hereinafter referred to collectively as Fig. 2) depicts the nucleotide (SEQ ID NO:1) and amino acid (SEQ ID NO:2) sequences of the IL-8 receptor cDNA insert from clone pRK5B.il8rl.1. The seven putative transmembrane domains are shown. There are 4 extracellular segments and 4 intracellular segments, each being separated by one of the transmembrane domains. The extracellular segments are approximately delineated by residues 1-39, 99-111, 134-154, 175-203 and 265-290. The IL-8 receptor contains 3 potential N-linked glycosylation sites in the first extracellular region and 3 more in the third extracellular loop.
